

CASE-STUDY: 2014 BMW X3 XDRIVE35I

Client Success Story – Car Motive Parts

Scan the QR Code

Client Overview

Client: Samantha Lee

Location: Denver, Colorado

Vehicle: 2014 BMW X3 xDrive35i (3.0L N55 Turbocharged Inline-6)

Mileage: 98,000 miles

Usage: Daily commuting and Weekend Mountain drives

Samantha Lee is a marketing consultant who loves the outdoors and counts on her 2014 BMW X3 xDrive35i. She enjoys the BMW sporty power and comfort, but a repeated engine problem nearly forced her to stop driving it for good.

Challenges Faced By Samantha

Samantha began to notice the following problems:

- ◆ Rough idle and misfires, especially at startup and during cold weather
- ◆ Check engine light persistent codes related to misfire and low compression
- ◆ The engine required oil top-ups every 1,000 miles
- ◆ Due to loss of power, there is noticeable turbo lag and sluggish

After visiting multiple times to local BMW service centers, a full diagnostic report revealed the internal engine damage due to timing chain stretch and valve cover gasket failure both common issues with the N55 engine.

◆ **Dealer Quote for Engine Replacement \$11,500:**

Unable to justify this high repair cost, Samantha looked for other reliable alternatives.

Solution Provided By Car Motive Parts

Samantha contacted Car Motive Parts after reading about our BMW engine solutions. Our team quickly guided her through available options and recommended a remanufactured N55 long block designed for the 2014 BMW X3 xDrive35i:

- ◆ Remanufactured 3.0L BMW N55 Engine Long Block
- ◆ It is completely rebuilt
- ◆ Reinforced against known N55 weaknesses
- ◆ Dyno-tested and tuned to OEM performance specs
- ◆ Warranty coverage of up to 2 years
- ◆ Technical installation support for Samantha's trusted independent BMW mechanic
- ◆ Free freight shipping to her local garage in Denver

Total cost is \$5,950 for engine + \$2,000 for installation which leads to total

Installation & Results

The engine arrived within 5 business days and was installed in just under a week. Samantha's mechanic noted that all mounting points, sensors, and connections matched perfectly, thanks to Car Motive Parts commitment to compatibility and precision.
